UNIVERSITY ADMIT ELIGIBILITY PREDICTOR

TEAM ID : PNT2022TMID31830

In this HTML page, we will create the front end part of the web page. On this page, we will accept input from the user and predict the values.

In our project we have 3 HTML files, they are

1. Demo2.html
2. chance.html
3. noChance.html

Build HTML Code

The image displays three sequential screenshots of a web application titled "University Admission Eligibility Prediction System".

The first screenshot shows the input form. On the left, a text block explains the system's purpose: "Enter your details and get probability of your admission. Students are often worried about their chances of admission to University. The aim of this project is to help students in shortlisting universities with their profiles. The predicted output gives them a fair idea about their admission chances in a particular university. This analysis should also help students who are currently preparing or will be preparing to get a better idea." Below this text is a small cartoon character of a professor. On the right, the "Enter the details" form includes input fields for GRE Score, TOFEL Score, University Rating, SOP, LOR, and CGPA. There is also a "Research:" section with radio buttons for "Yes" and "No", where "No" is selected.

The second screenshot shows the "You Have Chance" result page. It features a large, stylized illustration of a person with their arms raised in celebration. Below the illustration, the text reads: "You Have Chance. The model has predicted that you have 71.06887594445459% chance." A "Go Back" button is located at the bottom.

The third screenshot shows the "You have a LOW / NO chance" result page. It features a large, stylized illustration of a person with a large 'X' over their head, indicating a negative outcome. Below the illustration, the text reads: "You have a LOW / NO chance. The model has predicted that you only have 0% chance." A "Go Back" button is located at the bottom.
